Type : Missile launcher Accuracy : +2 Availability : Rare Concealability : Non concealable Magazine : 1 Rate of fire : 1	Cartridge : semi-guided HEAT missile (12D10 AP) Reliability : very reliable Range : 2000 meters Cost : 3945 eb Description : Datafortress 2020 Length : 110 cm Country : Japan
A dual purpose missile launcher from Arasaka. For anti-tank purposes the fired missile is wire guided to target, but for anti-aircraft purposes the weapon introduces an entirely new device. Its called the VITA system, the missile itself has a small camera mounted to it, which transmits the video back to the weapon's eyepiece. The weapon controls the missile by remote though controls added to the weapons grips. What it all boils down to is that if you can play a simple video game you can hit your target. The computer, receiver, and other electronics for this system are stored in a small box about the size of a gas can, and are jacked into the weapon prior to it being fired.

With the Piranha, Colt wants to compete with Malorian on its own turf. It's cheaper, more accurate and will make happy people among "the bigger the better" enthusiasts. Its only big flaw comes from its very long barrel which does not help its handling.	

Constitutional Arms M516D	
Type : Pump-action shotgun Accuracy : -2 Availability : Rare Concealability : Non concealable Magazine : 14 Rate of fire : 2/4	Cartridge : CAL10 (5D6/2D6+2/1D6+2) Reliability : standard Range : 50 meters Cost : 1920 eb Description : Blackhammer Cyberpunk Project Length : 96 cm Country : USA
The M516D, Double Model, is an over-and-under double-barreled variant of the 516S shotgun, restricted to military and in-house use. One of the few autoloading double-barreled shotguns on the market, it is much sought after, even with its weight of over 14 pounds fully loaded. It can be fired with both barrels simultaneously (ROF 4) or in sequence (ROF 2).	

Cybertronic AR3000 Assault Rifle	
Type : Assault rifle Accuracy : +1 Availability : Rare Concealability : Non concealable Magazine : 25 Rate of fire : 2/3/25	Cartridge : 7.62C (6D6+2) Reliability : standard Range : 400 meters Cost : 1350 eb Description : Blackhammer Cyberpunk Project Length : 108 cm Country : USA
The AR3000 has an integrated pump-action 40 mm grenade launcher below the barrel. A very expensive state of the art assault weapon, the AR3000 is also made of orbital steels sealed in an impact-proof polymer shell.

Concealability : Jacket	Cost : 880 eb
Magazine : 50	Description : Cyberpunk 2021
Rate of fire : 2/3/25	Length : 37 cm
	Country : Japan
Seburo loves to surprise us and with the C-28 they didn't miss their stunt. This SMG is designed to be the opposite of the C-25 : the magazine is, like the P90, placed at the top of the weapon, and the brass-catcher at the bottom near the stock. Unfortunately, while it is surprising in its design, its characteristics are exactly the same as those of the C-25.	

Seburo MN-10	
Type : Heavy submachine gun	Cartridge : 5.7 mm (3D6 AP)
Accuracy : +1	Reliability : very reliable
Availability : Poor	Range : 250 meters

This weapon is the sniping rifle that just won the rigorous CAS sniper rifle competition ! Designed to military specifications (instead of being a military adaptation of a civilian rifle model), the Walther is reliable and free of the design instabilities common to other weapons of the type. The professional's choice !
