

BEAM WEAPONS

By 2020, these weapons are in the experimental stage. Even though laser technology has been mastered for decades, the main problem is to make their energy source transportable by the average infantryman.

As a result, lasers and other electric weapons are extremely expensive, randomly reliable, and still have a relatively low range. On the other hand, they are very accurate and effective against armor. Needless to say, they are not available over the counter.

Arasaka-Tsunami Laser-Pulse Rifle	
Type : Laser rifle	Cartridge : battery (*)
Accuracy : +2	Reliability : unreliable
Availability : Rare	Range : 450 meters
Concealability : Non concealable	Cost : 10000 eb
Magazine : 30	Length : 90 cm
Rate of fire : 2/3/10	Country : Japan
Battery for 30 shots, damage : 3D6 AP, six hours charge. Experimental weapon commercialized in 2022.	

Arasaka X-LR-62 Laser Rifle	
Type : Laser rifle	Cartridge : battery (*)
Accuracy : +3	Reliability : standard
Availability : Rare	Range : 400 meters
Concealability : Non concealable	Cost : 112795 eb
Magazine : Diffère selon la puissance	Description : Datafortress 2020
Rate of fire : 1	Length : 120 cm
	Country : Japan
A new man-portable laser rifle has emerged on the battlefield. What makes this model different is its limited power selector which only includes 3 settings. The first is light and it does 3d6 damage and has can achieve up to one hundred shots with the standard battery belt, or a virtually unlimited amount if plugged into a wall socket or sufficient generator, this is made possible by the electric recharging and amplifying cylinder attached to the gun which acts much like a car's alternator. On the second setting, medium, you get a total of 30 seconds before the power is drained from the weapon. The last setting is heavy, and it gives one 3 second burst of 10D6 damage and then the gun is completely drained. However, due to the special "alternator" built into the weapon, recharging from a wall socket takes half the time as a normal laser although until the weapon is fully charged again it cannot be used, even on the light setting. Due to the rarity and extreme cost of the weapon, supplies are very limited, (no more than 5 to a customer) and orders must be paid in advance.	

Meta Armson Assault Laser	
Type : Laser rifle	Cartridge : battery (*)
Accuracy : +2	Reliability : very reliable
Availability : Rare	Range : 500 meters
Concealability : Non concealable	Cost : 46000 eb
Magazine : 20 à puissance moyenne	Description : Cyberpunk 2021
Rate of fire : 2/10	Length : 107 cm
	Country : USA
Adjustable damage from 1D6 to 8D6, rechargeable battery in 2 hours. Having only a low capacity internal battery, this rifle can be connected to an external source.	

Meta Armson LD-AX1	
Type : Laser rifle	Cartridge : battery (*)
Accuracy : +2	Reliability : standard
Availability : Rare	Range : 500 meters
Concealability : Non concealable	Cost : 125000 eb
Magazine : 30 à puissance moyenne	Description : Cyberpunk 2021
Rate of fire : 2/15	Length : 115 cm
	Country : USA
Rechargeable battery in six hours, damage adjustable from 1 to 10D6 AP. Successor of the Photon Assault Cannon, it is better on all points and therefore more expensive . .. Although a little lighter (45 kg), it also requires an assisted armor.	

Meta Armson Photon Assault Cannon	
Type : Laser rifle	Cartridge : battery (*)
Accuracy : +2	Reliability : unreliable
Availability : Rare	Range : 300 meters
Concealability : Non concealable	Cost : 80000 eb
Magazine : 30 à puissance moyenne	Description : Maximum Metal
Rate of fire : 2	Length : 140 cm
	Country : USA
Rechargeable battery in six hours, damage adjustable from 1 to 10D6 AP. Experimental model mountable on assisted armor (50 kg).	

Meta Armson Vulcan NE-700 Plasma	
Type : Laser rifle	Cartridge : battery (*)
Accuracy : 0	Reliability : very reliable
Availability : Rare	Range : 600 meters
Concealability : Non concealable	Cost : 72000 eb
Magazine : 30 à puissance moyenne	Description : Cyberpunk 2021
Rate of fire : 2/15	Length : 146 cm
	Country : USA
Rechargeable battery in six hours, damage adjustable from 1 to 10D6 AP. In spite of a lurid name, the NE-700 is by no means a plasma rifle. "Portable version" of the Photon Assault Cannon, it must nevertheless be connected to an external battery (38 kg) but can be handled by a man of good constitution as long as he does not carry the battery. The large size of the cannon is due to the cooling system.	

Militech Electronics Laser Cannon	
Type : Laser rifle	Cartridge : battery (*)
Accuracy : +2	Reliability : unreliable
Availability : Rare	Range : 200 meters
Concealability : Non concealable	Cost : 8000 eb
Magazine : 10 charges	Description : Cyberpunk 2020
Rate of fire : 2	Length : 81 cm
	Country : USA
Battery 10 charges (1 charge = 1D6), power adjustable from 1 to 5D6 per shot.	

Mitsubishi Stunner	
Type : Tesla pistol	Cartridge : battery (*)
Accuracy : -1	Reliability : standard
Availability : Excellent	Range : 5 meters
Concealability : Pocket	Cost : 170 eb
Magazine : 12	Length : 16 cm
Rate of fire : 1	Country : Japan
Battery 12 charges. Works on the principle of Techtronica's lightning weapons, but at a reduced intensity. A 5-meter arc spurts from the Stunner's electrode in the direction of the nearest conductive target. 1 point of real damage per burn, stun save at -1 to not fall unconscious.	

Techtronica HB-64CL	
Type : Laser rifle	Cartridge : battery (*)
Accuracy : +3	Reliability : very reliable
Availability : Rare	Range : 800 meters
Concealability : Non concealable	Cost : 220350 eb
Magazine : 20	Description : Datafortress 2020
Rate of fire : 1	Length : 120 cm
	Country : USA
Damage : 12D10, shot duration : 3 seconds. Unlike other combat lasers, this weapon has not alternate setting, it is always on full power. The dual beam does incredible damage. It's a good thing this weapon is so expensive, and the power supply is so limited.	

Techtronica M40 Pulse Rifle	
Type : Tesla rifle	Cartridge : liquid metal battery (*)
Accuracy : 0	Reliability : very reliable
Availability : Rare	Range : 50 meters
Concealability : Non concealable	Cost : 3500 eb
Magazine : 6	Description : Chrome 2
Rate of fire : 1/2	Length : 95 cm
	Country : USA
Effect according to the range. Living beings : death save at -3 at point blank, stun save at -5 at short range, stun save at -3 at medium range, stun save at -1 at long range, simple stun save at extreme range. Risks of failure for electronic and cybernetic equipment : PB : 50% (destruction) / SR : 100% (failure) / MR : 100% (failure for 1D3 hours) / LR : 70% (failure for 2D6 minutes) / ER : 30% (failure for 1D10 rounds). A refill costs 30 eb.	

Techtronica Model 009 Volt Pistol	
Type : Tesla pistol	Cartridge : liquid metal battery (*)
Accuracy : +1	Reliability : very reliable
Availability : Rare	Range : 25 meters
Concealability : Long coat	Cost : 950 eb
Magazine : 6	Description : Chrome 2
Rate of fire : 1	Length : 45 cm
	Country : USA
Damage : 3D6 (semi-real). Affected cybermembers crash for 1D6+3 turns. The armor does not protect against this type of damage.	

Valmet Hand Laser	
Type : Laser pistol	Cartridge : high energy battery (3D6 AP)
Accuracy : +2	Reliability : standard
Availability : Rare	Range : 50 meters
Concealability : Jacket	Cost : 2550 eb
Magazine : 10	Length : 79 cm
Rate of fire : 2	Country : Finland
Commercialized from 2023, this small-sized laser is the result of a long research on the miniaturization of these devices and their energy sources.
