

BORG AND ACPA HEAVY WEAPONS

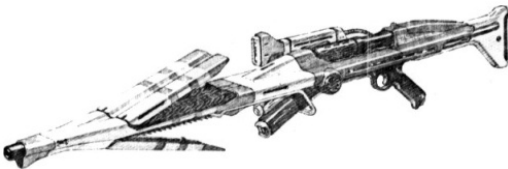

Note that a real combat borg (linear frame, integral conversion or even ACPA) can also go shopping in the "machine gun" section.

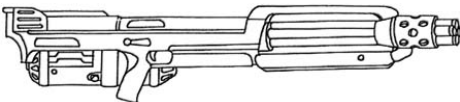

Arasaka-Malorian Assault .50	
Type : Very heavy assault rifle	Cartridge : .50 BMG (6D10)
Accuracy : -2	Reliability : standard
Availability : Poor	Range : 300 meters
Concealability : Non concealable	Cost : 1960 eb
Magazine : 25	Description : Datafortress 2020
Rate of fire : 2/3/10	Length : 119 cm
	Country : Japan
The Assault .50 is the joint venture product of Malorian and Arasaka. It is basically a less expensive and more combat engineered version of the Malorian "Aspen". It uses standard steel and ceramic construction and does not come smartchipped as standard.	

Arasaka Devastator	
Type : Very heavy semi-automatic rifle	Cartridge : 30 mm ETE (10D10+5)
Accuracy : +2	Reliability : very reliable
Availability : Rare	Range : 600 meters
Concealability : Non concealable	Cost : 12980 eb
Magazine : 8	Description : Datafortress 2020
Rate of fire : 1	Length : 130 cm
	Country : Japan
This is truly the biggest of the big man portable guns you are likely to ever find. This weapon is impossible to fire without a gyrostabilizer mount and at least a body of 10, at least if you want to survive the experience. Most commonly this weapon is used by full conversions or mounted to an ACPA or linear frame, however recently the weapon has been issued to special forces teams (along with an improved version of the same powered gyrostabilizer mount used on the EMG-85 railgun). Anything short of a battleship hit with this weapon will most likely be destroyed. Any human attempting to fire this weapon without a gyro stabilization mount will take 1d6+2 points of bruise damage regardless of body type, any human with a bod of 10 or lower (15 without the powered gyro-stabilization mount) firing this weapon must also roll a ten sided die, on a 5 or lower his shoulder is shattered. Also without a stabilization mount, any human firing the weapon, regardless of BOD will be flung back wards 2D6 feet unless thoroughly braced.

Concealability : Non concealable	Cost : 23890 eb
Magazine : 4000	Description : Datafortress 2020
Rate of fire : 200	Length : 95 cm
	Country : USA
This weapon, which is generally carried by perimeter defense and guard units, must be dual fed from a large ammo hopper containing 4000 rounds of ammunition which requires at least a strength of 40 to haul. It is possible for a chassis of a strength of at least 20 to fire the weapon, but without the mobile hopper strapped to his back it would be a stationary weapon. Once the ammo is expended, the weapon and the hopper are meant to be dropped. However due to the high cost of both weapon and hopper, disposal on a battlefield is not conducive, and therefore the weapon has limited versatility.

Basically, this weapon is an armor buster, for taking out even the toughest of opponents. This semiautomatic fires 14.5 mm HEAT shells from an over-the-shoulder position. It uses an advanced long-travel recoil absorption system, but even still, the recoil for this weapon is tremendous, and only the toughest troops can manage it. A BODY roll of 15+ is required to avoid taking 3 points of bruise damage to the firing arm. Armor is at 1/2, but any damage goes through at full value.
