Magazine : 100	Description : Datafortress 2020
Rate of fire : 100	Length : 58 cm
	Country : Japan
A man portable enclosed minigun capable of firing at 6000 rpm. It is quite heavy, and we recommend using a gyro-stabilization torso harness, or at the very least a shoulder sling when using this weapon.	

Arasaka Briareos	
Type : Very heavy semi-auto pistol	Cartridge : 7.62N (5D6+2)
Accuracy : -2	Reliability : very reliable
Availability : Rare	Range : 50 meters
Concealability : Long coat	Cost : 3150 eb
Magazine : 4	Description : Datafortress 2020
Rate of fire : 1	Length : 41 cm
	Country : Japan
Now this is a handgun, quite possibly one of the largest revolvers available, this fires the full sized 7.62 round. It was designed for use by full conversions and ACPA, but some brave souls have taken it upon themselves to try and fire this thing without augmentation (usually resulting in a broken wrist). A Body minimum of 14 is needed to fire this extremely large weapon.

Magazine : 40	Description : Datafortress 2020
Rate of fire : 2/3/20	Length : 61 cm, crosse rétractée
	Country : USA
Armalite's latest submachine gun is a sturdy and reliable workhorse, perhaps a bit heavy but the weight is more than worth it for the accuracy and ammo capacity of this excellent weapon. The adjustable stock is nice, though the apparatus is a bit overly done.	

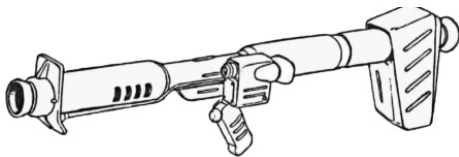

Beretta Hurricane	
Type : Medium submachine gun	Cartridge : 10 mm C (2D6+3)

Accuracy : +5	Reliability : unreliable
Availability : Rare	Range : 2000 meters
Concealability : Non concealable	Cost : 2560 eb
Magazine : 30	Description : Datafortress 2020
Rate of fire : 2	Length : 62 cm
Country : China	
Dai Lung is again moving into a dangerous area with its Horde micro-missile launcher. The weapon is quickly losing favor among the Chinese troops it is issued to for its extreme inaccuracy and tendency to malfunction. Unfortunately, the weapons only real innovation, its rotating 4 barrel system, designed to prevent overheating from the missile exhaust, is the primary source of the weapons malfunctions. Most commonly the barrel will under, or over rotate and lock up, preventing the weapon from firing. When this happens the weapon must be disassembled, as due to a flaw in design the electrical system has a tendency to short out easily.

Magazine : 6	Description : Datafortress 2020
Rate of fire : 1	Length : 132 cm
	Country : USA
The GA-72 is a bit heavy and unwieldy, making it hard to carry in the field, but its effectiveness more than makes up for that. One man is all that's needed to fire this behemoth, and properly trained he is more than capable of defending against any airborne attackers. The most remarkable thing about the weapon is that is also useful against ground targets, and for this purpose there is a switch on the weapon, allowing it to convert to an anti-tank weapon with enormous effectiveness.

<p>This low-yield nuclear device was developed by Militech as a way to destroy hardened bunkers and caves. The Damocles can be set to detonate on impact or by range. After detonation there will be an initial radioactive contamination of twice the area of the blast. The radiation will be considerably high for the first 24 hours but drop quickly after that, contaminating the soil and other materials in the area with low, but still dangerous if exposure is prolonged, levels of radiation. The Damocles is the final result of the re-opening of the W54 program, put forth by General Quartermain in preparation for a third South American Conflict, where caves, underground bunkers, dense jungles, and hardened facilities caused so many problems the last time around. The Damocles is US military use only and the Militech facility that manufactures them is itself on a military base, so even Militech does not have legal access to them.</p>

<p>Here is a novel approach to sniper rifles, use a shotgun. Seriously, this weapon is a bolt action rifle designed to fire APFSDS (Armor-Piercing Fin Stabilized Discarding Sabot) in 10 ga. The weapon is very accurate due to the stabilized round and the ammunition is considerably cheaper than the .50 BMG. Perfect for taking out vehicles and other lightly armored targets. The weapon accepts all standard 10 ga. ammunition but is only an effective sniper rifle when loaded with either the recommended FSAPDS ammo or simple 10 ga slugs.</p>

Shotguns are always popular weapons, and sawing off the barrel for a greater spread at close range is nothing new. This weapon takes it to the extreme. Most shotguns are shaved to the choke, this shotgun has actually had the choke shortened, dropping its ammo capacity to 2, but also enabling faster reloads and more concealability, and to further the conceivability factor, the stock has also been removed.
