Rechargeable battery in six hours, damage adjustable from 1 to 10D6 AP. In spite of a lurid name, the NE-700 is by no means a plasma rifle. "Portable version" of the Photon Assault Cannon, it must nevertheless be connected to an external battery (38 kg) but can be handled by a man of good constitution as long as he does not carry the battery. The large size of the cannon is due to the cooling system.

It is a specialist weapon, which can be used at relatively short ranges, because of weak ammunition. However, when fired in full automatic mode, the very high rate of fire combined with low recoil will result in a significant lethality through multiple hits to target.
